

Library

The library underwent a renovation in the early 1990s when Rev. Gary Huffman, minister at the time and a fine woodworker, built oak shelves to accommodate the volumes collected at the church. Under the leadership of Jan Douglass, a retired school librarian, the books and resources were catalogued with many new items being added to the collection for all ages. In 2008, the library is coming of age with Dr. Herbert Mitchell placing information from each and every volume into a data base for easy access by computer.
